SHORT WRITE-UP

I belong to the data science community of Ile-Ife of which I am being instructed in the ways of python, deep learning, machine learning and AI but having an experience to intern with you would increase my knowledge, improve my chances of becoming successful in my career path. Even though I have served in various capacities administratively e.g. as the General Secretary and Electoral Chairman of National Association of Mathematical Science Student of Nigeria, OAU. I have basically little or no experience in the data science field which is the reason why I look out for opportunities like this. I am confident that this program will really help me in life and push me closer to achieving my goals in life as a data scientist. I would greatly appreciate it if my application is considered.
